

Spina Bifida Support Group

One of the service delivery legs of the Social Development Committee of NCPPDSA is the launch of a National Spina Bifida Support Group. Currently there is not a National body that renders services to Persons with Spina Bifida and their families in South Africa. The Social Development Committee also took a resolution at their last workshop, that the support group will be launched in September 2009 in Pretoria, and effected families; educationalists and professionals in the medical field will be invited to attend. After this initial National launch, branches of the support group will be launched in all the provinces.
